

Taking Portfolio Bond business to new heights. Six new index-tracking funds.

With global equity prices substantially lower now than they were a few years ago, the current investment market offers investors a great deal of long-term growth potential. This means it's also a great time for you to attract new business. To help you and your clients make the most of the opportunity, we've introduced six new index-tracking funds available through Portfolio Bond.

Why the time is right for index-tracking

We believe it's only a matter of time before the markets rise. The question is when and where? Because index-tracking funds aim to eliminate stock selection risk by accurately reflecting the performance of entire markets, they could be very well suited to the current climate, where the prospects of long-term stock market growth are strong, but the short-term performance of individual companies and sectors remains difficult to predict.

It's also important to remember that the scale of index-tracking funds means they offer low fees and charges with an annual fund charge of 1.3% – a powerful selling point right now.

The new funds

Our new funds are available on all three Portfolio Bond charging structures and offer your clients index-tracking options for major markets from across the world, including the UK:

- Legal & General UK Equity Index Fund
- Legal & General European (excluding UK) Equity Index Fund
- Legal & General Global 100 Equity Index Fund
- Legal & General Japan Equity Index Fund
- Legal & General Pacific (excluding Japan) Equity Index Fund
- Legal & General US Equity Index Fund

For choice, choose Portfolio Bond

With the addition of our new index-tracking range, Portfolio Bond offers more than 320 funds from over 50 fund managers. It means you can create the right investment portfolio for every client, whatever their needs. The new funds will be available either direct from Legal & General or on the Cofunds platform.

New funds backed by our traditional strength and expertise

Few providers understand index-tracking investments as well as Legal & General. We were among the first to adopt the idea and today we're one of the largest managers of index-tracking funds in the UK with over £201 billion invested in indices worldwide as at 30 June 2008. Our new index-tracking funds are managed by Legal & General Investment Management (LGIM), one of the biggest and most experienced teams of investment managers in the UK market.

About Cofunds

Established in 2001, Cofunds is the UK's largest independent investment platform with over £14.8 billion of assets under administration as at 6 January 2009. Cofunds is wholly independent and specialises in helping advisers offer whole-of-market fund choice simply and cost effectively. Cofunds was voted Best Fund Supermarket in the Professional Adviser Awards 2007 and 2008.

Find out more

For more information about the new index-tracking funds or any other aspect of Portfolio Bond, please contact your usual representative or call **0845 070 6452**. Call charges will vary. We may monitor and record calls.
