The need for critical illness cover

The number of people surviving critical illnesses has increased significantly in recent years, due to advancements in medical science, improved hospital care and generally healthier lifestyles.

Whilst this is good news, it does mean that an increasing number of people are requiring financial support during their treatment and recovery, and to cope with their illness. It’s easy to assume or hope you would never be affected by a critical illness, but the reality is that it could happen to anyone – and when you least expect it.

These four conditions make up over 85% of our claims:

- **Heart related**
  
  2.3 million are currently living with coronary heart disease in the UK.
  
  An average of 460 people will lose their lives to cardiovascular disease every day.

- **Cancer**
  
  1 in 2 UK people will be diagnosed with cancer in their lifetime.
  
  The UK cancer population is set to grow from 2.5 million to four million by 2030.

- **Stroke**
  
  Stroke is the fourth biggest killer in the UK.
  
  Around 100,000 people suffer a stroke each year, that’s around one stroke every five minutes.

- **Multiple Sclerosis**
  
  Multiple sclerosis is nearly three times more common in women than men.
  
  MS is most often diagnosed in people in their 20s and 30s.

*Not all types of cancer are covered under critical illness cover plans

Our critical illness offerings

At Legal & General, we know that everybody’s lives are different. This is why we offer a choice of cover to suit your budget and lifestyle.

Critical Illness Cover and Critical Illness Extra could pay out a cash sum if you’re diagnosed with or undergo a medical procedure for one of the specified critical illness we cover during the length of the plan.

The lump sum could be used to help cover expenses and monthly outgoings while you recover.

Choose the cover that’s right for you
Our critical illness products
