 **TABLE OF CONDITIONS HISTORY****DEFINITIONS OF CONDITIONS HISTORY**

WELCOME.

To navigate through the history use the summary table. You can either click on a tick to go directly to the definition of a condition on a particular date, or click on the date to see the full list of conditions changed/covered in that particular month/year.

Changes to the conditions covered have been grouped by the date changes were made. Where definition names have changed, the most recent definition name appears in brackets below it.

SURGICAL TREATMENT

We will make an advanced payment if the life insured is placed on an NHS waiting list for one of the following surgical treatments and meets the full definitions.

Aorta graft surgery – requiring surgical replacement

Heart valve replacement or repair – with surgery

Peripheral vascular disease – requiring bypass surgery

Pulmonary artery surgery – requiring surgical replacement

Severe Crohn's disease – treated with two surgical intestinal resections or removal of entire large bowel

Specified heart surgery

Syringomyelia or syringobulbia – with surgery

Ulcerative colitis – resulting in the removal of the entire large bowel.

*Paid out under full cover. **Paid out under additional cover.

¹Brain injury due to trauma, anoxia or hypoxia moved from Critical Illness Extra to Critical Illness Cover from 07/2019.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

APRIL 2018

AORTIC ANEURYSM**
– WITH ENDOVASCULAR REPAIR

The undergoing of endovascular repair of an aneurysm of the thoracic or abdominal aorta with a graft.
For the above definition, the following are not covered:

- procedures to any branches of the thoracic or abdominal aorta.

APLASTIC ANAEMIA**
– CATEGORISED AS SEVERE

A definite diagnosis of severe aplastic anaemia by a consultant haematologist and evidenced by bone marrow histology. There must be an absolute neutrophil count of less than $0.5 \times 10^9/L$ and at least one of the following:

- a platelet count of less than $20 \times 10^9/L$.
- a reticulocyte count of less than $20 \times 10^9/L$.

BENIGN SPINAL CORD TUMOUR*
– RESULTING IN EITHER SPECIFIED
TREATMENT OR PERMANENT
SYMPTOMS

A non-malignant tumour originating from the spinal cord, spinal nerves or meninges within the spinal canal, resulting in either:

- surgical removal;
- radiotherapy;
- chemotherapy; or
- permanent neurological deficit with persisting clinical symptoms.

For the above definition, the following are not covered:

- angiomas;
- cysts;
- granulomas;
- haematomas; or
- osteophytes.

**BRAIN INJURY DUE TO ANOXIA
OR HYPOXIA***
– RESULTING IN PERMANENT
SYMPTOMS

Death of brain tissue due to inadequate oxygen supply resulting in permanent neurological deficit with persisting clinical symptoms.

CAROTID ARTERY STENOSIS**
– OF SPECIFIED SEVERITY RESULTING
IN SURGERY

The undergoing of endarterectomy or angioplasty on the advice of a hospital consultant to treat narrowing of at least 50% of the carotid artery.

APR 2018

NOV 2018

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

APRIL 2018

CAUDA EQUINA SYNDROME*
– RESULTING IN PERMANENT SYMPTOMS

A definite diagnosis of cauda equina syndrome (compression of the lumbosacral nerve roots) by a consultant neurologist resulting in all of the following:

- permanent bladder dysfunction; and
- permanent weakness and loss of sensation in the legs.

CENTRAL RETINAL ARTERY OR VEIN OCCLUSION**
– RESULTING IN PERMANENT SYMPTOMS

Death of optic nerve or retinal tissue due to inadequate blood supply or haemorrhage within the central retinal artery or vein, resulting in permanent visual impairment of the affected eye.

For the above definition, the following are not covered:

- occlusion or haemorrhage of the branches of the retinal artery or vein only; or
- traumatic injury to tissue of the optic nerve or retina.

CEREBRAL OR SPINAL ANEURYSM**
– WITH SPECIFIED TREATMENT

The undergoing of craniotomy, direct spinal surgery, endovascular repair or radiotherapy to treat a cerebral or spinal aneurysm.

CEREBRAL OR SPINAL ARTERIOVENOUS MALFORMATION**
– WITH SPECIFIED TREATMENT

The undergoing of craniotomy, direct spinal surgery, endovascular repair or radiotherapy to treat a cerebral or spinal arteriovenous fistula or malformation.

CROHN'S DISEASE**
– TREATED WITH ONE SURGICAL INTESTINAL RESECTION

A definite diagnosis of Crohn's disease by a consultant gastroenterologist resulting in surgical intestinal resection to remove part of the small intestine or bowel.

For the above definition, the following are not covered:

- surgical treatment for abscesses, fistulas or strictures.

DESMOID TYPE FIBROMATOSIS**
– WITH SPECIFIED TREATMENT

A positive diagnosis with histological confirmation of non-malignant aggressive fibromatosis by a hospital consultant resulting in either:

- surgical removal;
- radiotherapy; or
- chemotherapy.

DIABETES MELLITUS TYPE 1**
– REQUIRING SPECIFIED TREATMENT

A definite diagnosis of type 1 diabetes mellitus, requiring the permanent use of insulin injections.

The following are not covered:

- gestational diabetes
- type 2 diabetes (including type 2 diabetes treated with insulin).

APR 2018

NOV 2018

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

APRIL 2018

DRUG RESISTANT EPILEPSY*
– TREATED WITH INVASIVE SURGERY
TO BRAIN TISSUE

The undergoing of invasive surgery to brain tissue in order to control epilepsy that cannot be controlled by oral medication.

DRUG RESISTANT EPILEPSY**
– TREATED WITH VAGUS NERVE
STIMULATION

The undergoing of implantation under the skin of a stimulator, which is connected to the vagus nerve in order to control epilepsy that cannot be controlled by oral medication.

GUILLAIN-BARRE SYNDROME**
– WITH PERSISTING CLINICAL
SYMPTOMS

A definite diagnosis of Guillain-Barre syndrome by a consultant neurologist. There must be ongoing clinical impairment of motor or sensory function caused by Guillain-Barre Syndrome which must have persisted for a continuous period of at least six months.

HEART FAILURE*
– OF SPECIFIED SEVERITY

A definite diagnosis of failure of the heart to function as a pump by a consultant cardiologist which is evidenced by all of the following:

- permanent and irreversible ejection fraction of 39% or less; and
- permanent loss of ability to perform physical activities to at least Class 3 of the New York Heart Association classifications of functional capacity*.

*NYHA Class 3. Heart disease resulting in marked limitation of physical activities where less than ordinary activity causes fatigue, palpitation, breathlessness or chest pain.

INTENSIVE CARE*
– REQUIRING MECHANICAL
VENTILATION
FOR SEVEN DAYS

Sickness or injury resulting in continuous mechanical ventilation by means of tracheal intubation for seven consecutive days (24 hours per day) or more in an intensive care unit in a UK hospital.

For the above definition, the following is not covered:

- sickness or injury resulting in mechanical ventilation secondary to alcohol or drug intake.

INTERSTITIAL LUNG DISEASE*
– OF SPECIFIED SEVERITY

A definite diagnosis of interstitial lung disease resulting in all of the following:

- radiological evidence of pulmonary fibrosis; and
- permanent and irreversible DLCO (diffusing capacity of the lung for carbon monoxide) below 40% of predicted.

APRIL 2018

LESS ADVANCED CANCER**
– OF NAMED SITES AND SPECIFIED SEVERITY

There must be a positive diagnosis with histological confirmation for any of the following:

Anus – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the anus.

For the above definition, the following is not covered:

- anal intraepithelial neoplasia (AIN) grade 1 or 2.

Appendix, colon or rectum – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential of the appendix, colon or rectum.

Carcinoma in situ of the breast – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the breast.

For the above definition, the following is not covered:

- any other type of treatment.

Cervix – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove the cervix (trachelectomy) or hysterectomy on the advice of a hospital consultant following the diagnosis of carcinoma in situ of the cervix.

For the above definition, the following are not covered:

- loop excision;
- laser surgery;
- conisation and cryosurgery; or
- cervical intraepithelial neoplasia (CIN) grade 1 or 2.

Extrahepatic bile ducts – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the extrahepatic bile ducts.

Gallbladder – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the gallbladder.

Larynx – with specified treatment

The undergoing of surgery, laser treatment or radiotherapy on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the larynx.

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

APRIL 2018

LESS ADVANCED CANCER**
– OF NAMED SITES AND SPECIFIED SEVERITY

Continued

Low grade prostate cancer – requiring treatment

The undergoing of treatment on the advice of a hospital consultant following diagnosis of a malignant tumour of the prostate positively diagnosed and having a Gleason score between 2 and 6 inclusive and having progressed to a clinical TNM classification between T1N0M0 and T2aN0M0.

For the above definition, the following are not covered:

- prostatic intraepithelial neoplasia (PIN);
- observation or surveillance; or
- surgical biopsy.

Lung and bronchus – treated by surgery

The undergoing of wedge resection or lobectomy on the advice of a hospital consultant following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential of the lung or bronchus.

Oesophagus – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the oesophagus.

Oral cavity or oropharynx – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the oral cavity or oropharynx. The oropharynx includes lips, inside of cheeks, floor of the mouth, tongue, gums, hard palate, soft palate and tonsils.

For the above definition, the following is not covered:

- any other type of treatment.

Ovary – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove an ovary following the diagnosis of ovarian tumour of borderline malignancy/low malignant potential.

For the above definition, the following is not covered:

- removal of an ovary due to a cyst.

Pancreas – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential of the pancreas.

Renal pelvis (of the kidney) or ureter – of specified severity

A positive diagnosis on the advice of a hospital consultant of carcinoma in situ of the renal pelvis or ureter.

APRIL 2018

LESS ADVANCED CANCER**
– OF NAMED SITES AND SPECIFIED SEVERITY

Continued

Stomach – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of a low malignant potential of the stomach.

Testicle – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a testicle (orchidectomy) following the diagnosis of carcinoma in situ of the testicle (also known as intratubular germ cell neoplasia unclassified or ITGCNU).

Thyroid – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential of the thyroid.

Urinary bladder – of specified severity

A positive diagnosis of carcinoma in situ of the urinary bladder.

For the above definition, the following are not covered:

- non-invasive papillary carcinoma
- TNM classification stage Ta bladder cancer.

Uterus – treated by surgery

The undergoing of hysterectomy on the advice of your hospital consultant following the diagnosis of carcinoma in situ of the lining of the uterus (endometrium).

Vagina – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the vagina.

For the above definition, the following are not covered:

- laser surgery and diathermy; and
- vaginal intraepithelial neoplasia (VAIN) grade 1 and 2.

Vulva – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the vulva.

For the above definition, the following are not covered:

- laser surgery and diathermy; and
- vulval intraepithelial neoplasia (VIN) grade 1 or 2.

APR 2018

NOV 2018

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

APRIL 2018

MYASTHENIA GRAVIS*
– WITH SPECIFIED SYMPTOMS

A definite diagnosis of myasthenia gravis by a consultant neurologist. There must have been clinical impairment of motor function in parts of the body other than the eye muscles caused by myasthenia gravis.

For the above definition, the following is not covered:

- myasthenia gravis limited to eye muscles only.

**NEUROMYELITIS OPTICA
(FORMERLY DEVIC'S DISEASE)***
– WHERE THERE HAVE BEEN SYMPTOMS

A definite diagnosis of neuromyelitis optica by a consultant neurologist. There must have been clinical impairment of motor or sensory function caused by neuromyelitis optica.

**NON-INVASIVE GASTRO
INTESTINAL STROMAL TUMOUR****

A positive diagnosis with histological confirmation of non-invasive gastro intestinal stromal tumour by a hospital consultant.

**OTHER CANCER IN SITU OR
NEUROENDOCRINE TUMOUR (NET)
OF LOW MALIGNANT POTENTIAL****
– WITH SURGERY

The undergoing of surgery on the advice of a hospital consultant following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential.

For the above definition, the following are not covered:

- any skin cancer (including melanoma);
- tumours treated with radiotherapy, laser therapy, cryotherapy or diathermy treatment; or
- tumours already covered elsewhere in the policy.

PARKINSON'S PLUS SYNDROMES*
– RESULTING IN PERMANENT SYMPTOMS

A definite diagnosis of one of the following Parkinson's plus syndromes by a consultant neurologist:

- multiple system atrophy;
- progressive supranuclear palsy;
- Parkinsonism-dementia-amyotrophic lateral sclerosis complex;
- diffuse Lewy body disease; or
- corticobasal ganglionic degeneration.

There must also be permanent clinical impairment of at least one of the following:

- motor function;
- eye movement disorder;
- postural instability; or
- dementia.

For the above definition, the following are not covered:

- other Parkinsonian syndromes
- Parkinsonism.

APR 2018

NOV 2018

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

APRIL 2018

PERIPHERAL VASCULAR DISEASE*
– REQUIRING BYPASS SURGERY

A definite diagnosis of peripheral vascular disease by a consultant cardiologist or vascular surgeon with objective evidence from imaging of obstruction in the arteries requiring bypass graft surgery to an artery of the legs.
For the above definition, the following is not covered:

- any other surgical procedures or treatment.

PITUITARY GLAND TUMOUR**
– WITH SPECIFIED TREATMENT
OR RESULTING IN PERMANENT SYMPTOMS

A non-malignant tumour originating from the pituitary gland resulting in either:

- surgical removal;
- radiotherapy;
- chemotherapy; or
- permanent neurological deficit with persisting clinical symptoms.

For the above definition, the following are not covered:

- tumours originating from bone tissue; or
- angiomas and cholesteatoma.

PULMONARY ARTERY SURGERY*
– REQUIRING SURGICAL REPLACEMENT

The undergoing of surgery to the pulmonary artery, on the advice of a consultant cardiologist, with excision and surgical replacement of a portion of the pulmonary artery with a graft.

REMOVAL OF AN ENTIRE LUNG*
– DUE TO INJURY OR DISEASE

The undergoing of surgery to remove an entire lung as a result of injury or disease.
For the above definition, the following are not covered:

- other forms of surgery to the lungs including removal of a lobe.

REMOVAL OF AN EYEBALL*
– DUE TO INJURY OR DISEASE

Surgical removal of an eyeball as a result of injury or disease.
For the above definition, the following are not covered:

- self-inflicted injuries.

APR 2018

NOV 2018

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

APRIL 2018

REMOVAL OF ONE OR MORE LOBE(S) OF A LUNG**
 – DUE TO INJURY OR DISEASE

The undergoing of surgery to remove one or more lobe(s) of the lung as a result of injury or disease.
 For the above definition, the following are not covered:

- removal of a portion of a lobe of the lung only; or
- any other form of lung surgery.

REMOVAL OF URINARY BLADDER**
 – DUE TO INJURY OR DISEASE

The undergoing of surgery to remove the urinary bladder (total cystectomy).
 For the above definition, the following is not covered:

- removal of a portion of the urinary bladder.

SEVERE CROHN'S DISEASE*
 – TREATED WITH TWO SURGICAL INTESTINAL RESECTIONS OR REMOVAL OF ENTIRE LARGE BOWEL

A definite diagnosis of Crohn's disease by a consultant gastroenterologist resulting in either:

- surgical intestinal resection to remove part of the small intestine or bowel on at least two separate occasions; or
- removal of entire large bowel (total colectomy).

For the above definition, the following are not covered:

- surgical treatment for abscesses, fistulas or strictures.

SIGNIFICANT VISUAL LOSS**
 – PERMANENT AND IRREVERSIBLE

Permanent and irreversible loss of sight to the extent that even when tested with the use of visual aids vision is measured at 6/24 or worse in the better eye using Snellen eye chart, or visual field is reduced to 45 degrees or less of an arc, as measured by an ophthalmologist.

SYRINGOMYELIA OR SYRINGOBULBIA*
 – WITH SURGERY

The undergoing of surgery to treat a syrinx in the spinal cord or brain stem.

THIRD DEGREE BURNS**
 – COVERING 10% OF THE SURFACE AREA OF THE BODY OR 10% OF THE FACE OR HEAD

Burns that involve damage or destruction of the skin to its full depth through to the underlying tissue and covering at least 10% of the:

- body's surface area;
- or face or head.

ULCERATIVE COLITIS*
 – RESULTING IN THE REMOVAL OF THE ENTIRE LARGE BOWEL

A definite diagnosis of ulcerative colitis confirmed by a consultant gastroenterologist, resulting in a removal of the entire large bowel (total colectomy).

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

NOVEMBER 2018

AORTIC ANEURYSM**
– WITH ENDOVASCULAR REPAIR

The undergoing of endovascular repair of an aneurysm of the thoracic or abdominal aorta with a graft.
For the above definition, the following are not covered:

- procedures to any branches of the thoracic or abdominal aorta.

APLASTIC ANAEMIA**
– CATEGORISED AS SEVERE

A definite diagnosis of severe aplastic anaemia by a consultant haematologist and evidenced by bone marrow histology. There must be an absolute neutrophil count of less than $0.5 \times 10^9/L$ and at least one of the following:

- a platelet count of less than $20 \times 10^9/L$.
- a reticulocyte count of less than $20 \times 10^9/L$.

BENIGN SPINAL CORD TUMOUR*
– RESULTING IN EITHER SPECIFIED
TREATMENT OR PERMANENT
SYMPTOMS

A non-malignant tumour originating from the spinal cord, spinal nerves or meninges within the spinal canal, resulting in either:

- surgical removal;
- radiotherapy;
- chemotherapy; or
- permanent neurological deficit with persisting clinical symptoms.

For the above definition, the following are not covered:

- angiomas;
- cysts;
- granulomas;
- haematomas; or
- osteophytes.

**BRAIN INJURY DUE TO ANOXIA
OR HYPOXIA***
– RESULTING IN PERMANENT
SYMPTOMS

Death of brain tissue due to inadequate oxygen supply resulting in permanent neurological deficit with persisting clinical symptoms.

CAROTID ARTERY STENOSIS**
– OF SPECIFIED SEVERITY RESULTING
IN SURGERY

The undergoing of endarterectomy or angioplasty on the advice of a hospital consultant to treat narrowing of at least 50% of the carotid artery.

APR 2018

NOV 2018

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

NOVEMBER 2018

CAUDA EQUINA SYNDROME*
– RESULTING IN PERMANENT SYMPTOMS

A definite diagnosis of cauda equina syndrome (compression of the lumbosacral nerve roots) by a consultant neurologist resulting in all of the following:

- permanent bladder dysfunction; and
- permanent weakness and loss of sensation in the legs.

CENTRAL RETINAL ARTERY OR VEIN OCCLUSION**
– RESULTING IN PERMANENT SYMPTOMS

Death of optic nerve or retinal tissue due to inadequate blood supply or haemorrhage within the central retinal artery or vein, resulting in permanent visual impairment of the affected eye.

For the above definition, the following are not covered:

- occlusion or haemorrhage of the branches of the retinal artery or vein only; or
- traumatic injury to tissue of the optic nerve or retina.

CEREBRAL OR SPINAL ANEURYSM**
– WITH SPECIFIED TREATMENT

The undergoing of craniotomy, direct spinal surgery, endovascular repair or radiotherapy to treat a cerebral or spinal aneurysm.

CEREBRAL OR SPINAL ARTERIOVENOUS MALFORMATION**
– WITH SPECIFIED TREATMENT

The undergoing of craniotomy, direct spinal surgery, endovascular repair or radiotherapy to treat a cerebral or spinal arteriovenous fistula or malformation.

CROHN'S DISEASE**
– TREATED WITH ONE SURGICAL INTESTINAL RESECTION

A definite diagnosis of Crohn's disease by a consultant gastroenterologist resulting in surgical intestinal resection to remove part of the small intestine or bowel.

For the above definition, the following are not covered:

- surgical treatment for abscesses, fistulas or strictures.

DESMOID TYPE FIBROMATOSIS**
– WITH SPECIFIED TREATMENT

A positive diagnosis with histological confirmation of non-malignant aggressive fibromatosis by a hospital consultant resulting in either:

- surgical removal;
- radiotherapy; or
- chemotherapy.

DIABETES MELLITUS TYPE 1**
– REQUIRING SPECIFIED TREATMENT

A definite diagnosis of type 1 diabetes mellitus, requiring the permanent use of insulin injections.

The following are not covered:

- gestational diabetes
- type 2 diabetes (including type 2 diabetes treated with insulin).

APR 2018

NOV 2018

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

NOVEMBER 2018

DRUG RESISTANT EPILEPSY*
– TREATED WITH INVASIVE SURGERY TO BRAIN TISSUE

The undergoing of invasive surgery to brain tissue in order to control epilepsy that cannot be controlled by oral medication.

DRUG RESISTANT EPILEPSY**
– TREATED WITH VAGUS NERVE STIMULATION

The undergoing of implantation under the skin of a stimulator, which is connected to the vagus nerve in order to control epilepsy that cannot be controlled by oral medication.

GUILLAIN-BARRE SYNDROME**
– WITH PERSISTING CLINICAL SYMPTOMS

A definite diagnosis of Guillain-Barre syndrome by a consultant neurologist. There must be ongoing clinical impairment of motor or sensory function caused by Guillain-Barre Syndrome which must have persisted for a continuous period of at least six months.

HEART FAILURE*
– OF SPECIFIED SEVERITY

A definite diagnosis of failure of the heart to function as a pump by a consultant cardiologist which is evidenced by all of the following:

- permanent and irreversible ejection fraction of 39% or less; and
- permanent loss of ability to perform physical activities to at least Class 3 of the New York Heart Association classifications of functional capacity*.

*NYHA Class 3. Heart disease resulting in marked limitation of physical activities where less than ordinary activity causes fatigue, palpitation, breathlessness or chest pain.

INTENSIVE CARE*
– REQUIRING MECHANICAL VENTILATION FOR SEVEN DAYS

Sickness or injury resulting in continuous mechanical ventilation by means of tracheal intubation for seven consecutive days (24 hours per day) or more in an intensive care unit in a UK hospital.

For the above definition, the following is not covered:

- sickness or injury resulting in mechanical ventilation secondary to alcohol or drug intake.

INTERSTITIAL LUNG DISEASE*
– OF SPECIFIED SEVERITY

A definite diagnosis of interstitial lung disease resulting in all of the following:

- radiological evidence of pulmonary fibrosis; and
- permanent and irreversible DLCO (diffusing capacity of the lung for carbon monoxide) below 40% of predicted.

LESS ADVANCED CANCER**
– OF NAMED SITES AND SPECIFIED SEVERITY

There must be a positive diagnosis with histological confirmation for any of the following:

Anus – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the anus.

For the above definition, the following is not covered:

- anal intraepithelial neoplasia (AIN) grade 1 or 2.

Appendix, colon or rectum – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential of the appendix, colon or rectum.

Carcinoma in situ of the breast – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the breast.

For the above definition, the following is not covered:

- any other type of treatment.

Cervix – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove the cervix (trachelectomy) or hysterectomy on the advice of a hospital consultant following the diagnosis of carcinoma in situ of the cervix.

For the above definition, the following are not covered:

- loop excision;
- laser surgery;
- conisation and cryosurgery; or
- cervical intraepithelial neoplasia (CIN) grade 1 or 2.

Extrahepatic bile ducts – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the extrahepatic bile ducts.

Gallbladder – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the gallbladder.

Larynx – with specified treatment

The undergoing of surgery, laser treatment or radiotherapy on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the larynx.

Low grade prostate cancer – requiring treatment

The undergoing of treatment on the advice of a hospital consultant following diagnosis of a malignant tumour of the prostate positively diagnosed and having a Gleason score between 2 and 6 inclusive and having progressed to a clinical TNM classification between T1N0M0 and T2aN0M0.

For the above definition, the following are not covered:

- prostatic intraepithelial neoplasia (PIN);
- observation or surveillance; or
- surgical biopsy.

Lung and bronchus – treated by surgery

The undergoing of wedge resection or lobectomy on the advice of a hospital consultant following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential of the lung or bronchus.

Oesophagus – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the oesophagus.

Oral cavity or oropharynx – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the oral cavity or oropharynx. The oropharynx includes lips, inside of cheeks, floor of the mouth, tongue, gums, hard palate, soft palate and tonsils.

For the above definition, the following is not covered:

- any other type of treatment.

Ovary – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove an ovary following the diagnosis of ovarian tumour of borderline malignancy/low malignant potential.

For the above definition, the following is not covered:

- removal of an ovary due to a cyst.

Pancreas – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential of the pancreas.

Renal pelvis (of the kidney) or ureter – of specified severity

A positive diagnosis on the advice of a hospital consultant of carcinoma in situ of the renal pelvis or ureter.

Stomach – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of a low malignant potential of the stomach.

Testicle – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a testicle (orchidectomy) following the diagnosis of carcinoma in situ of the testicle (also known as intratubular germ cell neoplasia unclassified or ITGCNU).

Thyroid – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential of the thyroid.

Urinary bladder – of specified severity

A positive diagnosis of carcinoma in situ of the urinary bladder.

For the above definition, the following are not covered:

- non-invasive papillary carcinoma
- TNM classification stage Ta bladder cancer.

Uterus – treated by surgery

The undergoing of hysterectomy on the advice of your hospital consultant following the diagnosis of carcinoma in situ of the lining of the uterus (endometrium).

Vagina – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the vagina.

For the above definition, the following are not covered:

- laser surgery and diathermy; and
- vaginal intraepithelial neoplasia (VAIN) grade 1 and 2.

Vulva – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the vulva.

For the above definition, the following are not covered:

- laser surgery and diathermy; and
- vulval intraepithelial neoplasia (VIN) grade 1 or 2.

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

NOVEMBER 2018

MYASTHENIA GRAVIS*
– WITH SPECIFIED SYMPTOMS

A definite diagnosis of myasthenia gravis by a consultant neurologist. There must have been clinical impairment of motor function in parts of the body other than the eye muscles caused by myasthenia gravis. For the above definition, the following is not covered:

- myasthenia gravis limited to eye muscles only.

NEUROMYELITIS OPTICA (FORMERLY DEVIC'S DISEASE)*
– WHERE THERE HAVE BEEN SYMPTOMS

A definite diagnosis of neuromyelitis optica by a consultant neurologist. There must have been clinical impairment of motor or sensory function caused by neuromyelitis optica.

NON-INVASIVE GASTRO INTESTINAL STROMAL TUMOUR**

A positive diagnosis with histological confirmation of non-invasive gastro intestinal stromal tumour by a hospital consultant.

OTHER CANCER IN SITU OR NEUROENDOCRINE TUMOUR (NET) OF LOW MALIGNANT POTENTIAL**
– WITH SURGERY

The undergoing of surgery on the advice of a hospital consultant following the diagnosis of carcinoma in situ or neuroendocrine tumour (NET) of low malignant potential. For the above definition, the following are not covered:

- any skin cancer (including melanoma);
- tumours treated with radiotherapy, laser therapy, cryotherapy or diathermy treatment; or
- tumours already covered elsewhere in the policy.

PARKINSON'S PLUS SYNDROMES*
– RESULTING IN PERMANENT SYMPTOMS

A definite diagnosis of one of the following Parkinson's plus syndromes by a consultant neurologist:

- multiple system atrophy;
- progressive supranuclear palsy;
- Parkinsonism-dementia-amyotrophic lateral sclerosis complex;
- diffuse Lewy body disease; or
- corticobasal ganglionic degeneration.

There must also be permanent clinical impairment of at least one of the following:

- motor function;
- eye movement disorder;
- postural instability; or
- dementia.

For the above definition, the following are not covered:

- other Parkinsonian syndromes
- Parkinsonism.

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

NOVEMBER 2018

PERIPHERAL VASCULAR DISEASE*
– REQUIRING BYPASS SURGERY

A definite diagnosis of peripheral vascular disease by a consultant cardiologist or vascular surgeon with objective evidence from imaging of obstruction in the arteries requiring bypass graft surgery to an artery of the legs.

For the above definition, the following is not covered:

- any other surgical procedures or treatment.

PITUITARY GLAND TUMOUR**
– WITH SPECIFIED TREATMENT
OR RESULTING IN PERMANENT
SYMPTOMS

A non-malignant tumour originating from the pituitary gland resulting in either:

- surgical removal;
- radiotherapy;
- chemotherapy; or
- permanent neurological deficit with persisting clinical symptoms.

For the above definition, the following are not covered:

- tumours originating from bone tissue; or
- angiomas and cholesteatoma.

PULMONARY ARTERY SURGERY*
– REQUIRING SURGICAL
REPLACEMENT

The undergoing of surgery to the pulmonary artery, on the advice of a consultant cardiologist, with excision and surgical replacement of a portion of the pulmonary artery with a graft.

REMOVAL OF AN ENTIRE LUNG*
– DUE TO INJURY OR DISEASE

The undergoing of surgery to remove an entire lung as a result of injury or disease.

For the above definition, the following are not covered:

- other forms of surgery to the lungs including removal of a lobe.

REMOVAL OF AN EYEBALL*
– DUE TO INJURY OR DISEASE

Surgical removal of an eyeball as a result of injury or disease.

For the above definition, the following are not covered:

- self-inflicted injuries.

NOV 2018

JUL 2019

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

NOVEMBER 2018

REMOVAL OF ONE OR MORE LOBE(S) OF A LUNG**
– DUE TO INJURY OR DISEASE

The undergoing of surgery to remove one or more lobe(s) of the lung as a result of injury or disease.
For the above definition, the following are not covered:

- removal of a portion of a lobe of the lung only; or
- any other form of lung surgery.

REMOVAL OF URINARY BLADDER**
– DUE TO INJURY OR DISEASE

The undergoing of surgery to remove the urinary bladder (total cystectomy).
For the above definition, the following is not covered:

- removal of a portion of the urinary bladder.

SEVERE CROHN'S DISEASE*
– TREATED WITH TWO SURGICAL INTESTINAL RESECTIONS OR REMOVAL OF ENTIRE LARGE BOWEL

A definite diagnosis of Crohn's disease by a consultant gastroenterologist resulting in either:

- surgical intestinal resection to remove part of the small intestine or bowel on at least two separate occasions; or
- removal of entire large bowel (total colectomy).

For the above definition, the following are not covered:

- surgical treatment for abscesses, fistulas or strictures.

SIGNIFICANT VISUAL LOSS**
– PERMANENT AND IRREVERSIBLE

Permanent and irreversible loss of sight to the extent that even when tested with the use of visual aids vision is measured at 6/24 or worse in the better eye using Snellen eye chart, or visual field is reduced to 45 degrees or less of an arc, as measured by an ophthalmologist.

SYRINGOMYELIA OR SYRINGOBULBIA*
– WITH SURGERY

The undergoing of surgery to treat a syrinx in the spinal cord or brain stem.

THIRD DEGREE BURNS**
– COVERING 10% OF THE SURFACE AREA OF THE BODY OR 10% OF THE FACE OR HEAD

Burns that involve damage or destruction of the skin to its full depth through to the underlying tissue and covering at least 10% of the:

- body's surface area;
- or face or head.

ULCERATIVE COLITIS*
– RESULTING IN THE REMOVAL OF THE ENTIRE LARGE BOWEL

A definite diagnosis of ulcerative colitis confirmed by a consultant gastroenterologist, resulting in a removal of the entire large bowel (total colectomy).

CORONARY ANGIOPLASTY**

The undergoing of percutaneous coronary intervention (PCI) to correct narrowing or blockages of either:

- two or more main coronary arteries, or
- the left main stem artery.

The main coronary arteries for this purpose are defined as right coronary artery, left main stem, left anterior descending artery, and circumflex artery, or their branches. Multiple arteries must be treated at the same time or as part of a planned staged procedure within 60 days of the first PCI. PCI is defined as any therapeutic intra-arterial catheter procedure including balloon angioplasty and/or stenting.

The following are not covered:

- angiography; and
- two procedures to a single main artery or branches of the same.

CROHN'S DISEASE**

There must be a positive diagnosis with histological confirmation for any of the following:

Carcinoma in situ of the breast – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the breast.

For the above definition, the following is not covered:

- any other type of treatment.

Cervix – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove the cervix (trachelectomy) or hysterectomy on the advice of a hospital consultant following the diagnosis of carcinoma in situ of the cervix.

For the above definition, the following are not covered:

- loop excision;
- laser surgery;
- conisation and cryosurgery; or
- cervical intraepithelial neoplasia (CIN) grade 1 or 2.

Larynx – with specified treatment

The undergoing of surgery, laser treatment or radiotherapy on the advice of a hospital consultant to remove a tumour following the diagnosis of carcinoma in situ of the larynx.

Low grade prostate cancer – requiring treatment

The undergoing of treatment on the advice of a hospital consultant following diagnosis of a malignant tumour of the prostate positively diagnosed and having a Gleason score between 2 and 6 inclusive and having progressed to a clinical TNM classification between T1N0M0 and T2aN0M0.

For the above definition, the following are not covered:

- prostatic intraepithelial neoplasia (PIN);
- observation or surveillance; or
- surgical biopsy.

Ovary – treated by surgery

The undergoing of surgery on the advice of a hospital consultant to remove an ovary following the diagnosis of ovarian tumour of borderline malignancy/low malignant potential.

For the above definition, the following is not covered:

- removal of an ovary due to a cyst.

Renal pelvis (of the kidney) or ureter – of specified severity

A positive diagnosis on the advice of a hospital consultant of carcinoma in situ of the renal pelvis or ureter.

Urinary bladder – of specified severity

A positive diagnosis of carcinoma in situ of the urinary bladder.

For the above definition, the following are not covered:

- non-invasive papillary carcinoma
- TNM classification stage Ta bladder cancer.

Uterus – treated by surgery

The undergoing of hysterectomy on the advice of your hospital consultant following the diagnosis of carcinoma in situ of the lining of the uterus (endometrium).

MYASTHENIA GRAVIS*
 – WITH SPECIFIED SYMPTOMS

No change

NECROTISING FASCIITIS*

The undergoing of surgery to treat life threatening necrotising fasciitis or gas gangrene to remove necrotic tissue and intravenous antibiotic treatment to prevent immediate death.

For the above definition, the following are not covered:

- all other forms of gangrene or cellulitis.

SURGICAL TREATMENT

We will make an advanced payment if the life insured is placed on an NHS waiting list for one of the following surgical treatments and meets the full definitions:

Aorta graft surgery – requiring surgical replacement

Heart valve replacement or repair – with surgery

Specified heart surgery

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

4 FEBRUARY 1996

Summary – CIC introduced as a rider available on Level Term Assurance, Convertible Term Assurance and Decreasing Term Assurance plans.

ANGIOPLASTY

The undergoing of balloon angioplasty to correct the narrowing or blockage of two or more arteries, when the Life Assured has limiting anginal symptoms. Any claim must be supported by: evidence of prior treatment (on appropriate medication) from an appropriate registered medical practitioner holding an appointment at a hospital in the UK or Republic of Ireland; and evidence of significant electrocardiogram changes; and evidence of angiography showing 70% obstruction of two or more coronary arteries.

**AORTA SURGERY
(AORTA GRAFT SURGERY)**

The actual undergoing of surgery for a disease of the aorta needing excision and surgical replacement of a portion of the diseased aorta with a graft. For the purposes of this definition aorta shall mean the thoracic and abdominal aorta but not its branches.

BENIGN BRAIN TUMOUR

This means a non malignant tumour within the cranium, and does not include cysts, granulomas, malformations in, or of, the arteries or veins of the brain, haematomas or tumours in the pituitary gland or spine.

BLINDNESS

Total and irreversible loss of sight in both eyes. Total is defined as a corrected visual acuity of 3/60 or less in each eye.

**BURNS
(THIRD DEGREE BURNS)**

This means third degree burns covering at least 20% of the surface area of the body of the Life Assured, as certified by a specialist consultant.

CANCER

A malignant tumour characterised by the uncontrolled growth and spread of malignant cells and the invasion of tissue. This includes leukaemia and Hodgkin's disease but excludes:

1. non-invasive cancer in situ,
2. tumours in the presence of HIV,
3. any skin cancer other than invasive malignant melanoma.

DEFINITIONS OF CONDITIONS HISTORY

4 FEBRUARY 1996

COMA	This means unconsciousness, with no reaction to stimuli continuing for at least 96 hours. Life support systems must be required throughout the period of unconsciousness.
CORONARY ARTERY DISEASE SURGERY (CORONARY ARTERY BY-PASS GRAFTS)	The undergoing of open heart surgery on the advice of a consultant cardiologist to correct narrowing or blockage of one or more coronary arteries with by-pass grafts but excluding balloon angioplasty (except as defined in Angioplasty) laser or any other procedures.
HEART ATTACK	The death of a portion of the heart muscle as a result of inadequate blood supply as evidenced by an episode of typical chest pain, new electrocardiographic change and by the elevation of cardiac enzymes.
HEART VALVE SURGERY (HEART VALVE REPLACEMENT OR REPAIR)	The undergoing of open-heart surgery to correct valvular abnormalities.
HIV/AIDS COVER FOR MEDICAL STAFF AND OTHER SPECIFIED GROUPS (HIV INFECTION)	<p>The Life Assured being infected by Human Immuno-deficiency Virus (HIV), or, suffering from Acquired Immune Deficiency Syndrome only if the Life Assured's occupation is in the list below and providing that all of the following are satisfied:</p> <ul style="list-style-type: none"> (i) The infection arose in the course of the Life Assured's normal duties and has been acquired as a result of contact with an HIV infected person involving passing of blood or body fluid from an HIV infected person or with an HIV infected medical instrument. (ii) The incident that results in such contact must have occurred after the Policy Date and must have been reported, investigated and documented in accordance with established procedures for such an accident. (iii) The Life Assured must have been tested within five days of the incident and shown not to have antibodies of HIV. (iv) Within 10 days of the incident, the circumstances were reported in full to Legal & General Assurance Society Ltd at its Principal Office and, it was reported that the Life Assured underwent the blood test, referred to in (iii) above. (v) A further blood test within 12 months of the incident indicated the presence of HIV or antibodies to such a virus.

 - Prison Staff

KIDNEY FAILURE

End stage renal failure presenting as chronic irreversible failure of both kidneys to function, as a result of which either regular renal dialysis or renal transplant is initiated.

LOSS OF HEARING (DEAFNESS)

Total and irreversible loss of hearing in both ears which must be established for a continuous period of 12 months, as confirmed by an appropriate consultant physician holding an appointment in a hospital in the UK or Republic of Ireland.

LOSS OF SPEECH

Total and irreversible loss of the ability to speak because of physical injury or disease, which must be established for a continuous period of 12 months, as confirmed by an appropriate consultant physician holding an appointment in a hospital in the UK or Republic of Ireland.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

4 FEBRUARY 1996

LOSS OF TWO OR MORE LIMBS (LOSS OF HAND OR FOOT)	The total and irrecoverable loss of two or more limbs. A limb is defined as an arm above the wrist joint or a leg above the ankle joint.
MAJOR ORGAN TRANSPLANT	The actual undergoing as a recipient of, or confirmation of acceptance on to the official United Kingdom programme waiting list for, a transplant of a heart, liver, lung, pancreas or bone marrow.
MOTOR NEURONE DISEASE	Motor neurone disease as diagnosed by a consultant neurologist holding an appointment in a hospital in the UK or Republic of Ireland.
MULTIPLE SCLEROSIS	Confirmation by a consultant neurologist of definite diagnosis of multiple sclerosis producing at least moderate neurological abnormalities which have persisted for a continuous period of six months.
PARALYSIS/PARAPLEGIA (PARALYSIS OF A LIMB)	The total and irrecoverable loss of the use of two or more limbs.
PARKINSON'S DISEASE	An unequivocal diagnosis of Parkinson's disease made by a consultant neurologist holding an appointment in a hospital in the UK or Republic of Ireland. Only idiopathic Parkinson's disease is covered. All other forms of Parkinsonism are excluded.
PRE SENILE DEMENTIA BEFORE AGE 65 (DEMENTIA)	A diagnosis, before the 65th birthday of the Life Assured, by a consultant neurologist holding an appointment in a hospital in the UK or Republic of Ireland of pre senile dementia such as that caused by Alzheimer's disease. The diagnosis must, at the time it is made, be supported by evidence of progressive deterioration of memory and of the ability to reason and to perceive, understand, express and give effect to ideas.
STROKE	A cerebrovascular incident resulting in permanent neurological damage. Transient ischaemic attacks are specifically excluded.

PERMANENT AND TOTAL DISABILITY (TOTAL AND PERMANENT DISABILITY)

The Sum Assured will be payable:

- (a) If the Life Assured is not in any gainful occupation immediately before the onset of disability and suffers, through illness or accident, a mental or physical irreversible disability which, in the opinion of the Chief Medical Officer of Legal & General, results in the Life Assured being permanently unable to perform, without the direct assistance of a third party, four or more of the following functions:
- (i) Mobility – the ability to move from one room to another adjoining room or from one side of a room to another to get in and out of bed or a chair without requiring physical assistance of another person.
 - (ii) Contenance – the ability to voluntarily control bowel and bladder functions such as to maintain personal hygiene.
 - (iii) Dressing or undressing self – putting on or taking off all necessary items of clothing without requiring assistance of another person.
 - (iv) Washing and bathing self – washing or bathing to the extent needed to maintain personal cleanliness without requiring assistance of another person.
 - (v) Eating – all tasks of getting food into the body once it has been prepared.
 - (vi) Toileting – getting to and from the toilet, transferring on or off the toilet and associated personal hygiene.

OR

- (b) One of the Any Occupation definition or Own Occupation definition wordings:

Any Occupation definition

If the Life Assured, by reason of sickness or accident, is totally unable to follow any occupation and in the opinion of the Chief Medical Officer of Legal & General is likely to remain so permanently. Such decision will be based on all of the medical evidence available.

Own Occupation definition

If the Life Assured, by reason of sickness or accident, is totally unable to follow his or her occupation and in the opinion of the Chief Medical Officer of Legal & General is likely to remain so permanently. Such decision will be based on all of the medical evidence available.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

26 JUNE 1999

Summary – Changes to most definitions and Alzheimer’s Disease added.

ALZHEIMER’S DISEASE BEFORE AGE 65 (ALZHEIMER’S DISEASE)

A diagnosis, before the 65th birthday of the Life Assured by a consultant neurologist of Alzheimer’s disease. The diagnosis must, at the time it is made, be supported by evidence of progressive deterioration of memory and of the ability to reason and to perceive, understand, express and give effect to ideas.

ANGIOPLASTY

The undergoing of balloon angioplasty to correct the narrowing or blockage of two or more arteries, when the Life Assured has limiting anginal symptoms. Any claim must be supported by:

- Evidence of prior treatment (on appropriate medication) from an appropriate registered medical practitioner holding such an appointment at a hospital in the UK and;
- Evidence of significant electrocardiogram changes and;
- Evidence of angiography showing 70% obstruction of two or more coronary arteries.

AORTA GRAFT SURGERY

Undergoing surgery for disease of the aorta needing excision and surgical replacement of a portion of the diseased aorta with a graft. For this definition, aorta means the thoracic and abdominal aorta but not its branches.

BENIGN BRAIN TUMOUR

A non malignant tumour in the brain resulting in permanent deficit to the neurological system. Tumours or lesions in the pituitary gland are not covered.

BLINDNESS

Total, permanent and irreversible loss of all sight in both eyes.

CANCER (MOST MALIGNANT TYPES) (CANCER)

A malignant tumour characterised by the uncontrolled growth and spread of malignant cells and invasion of tissue. The term cancer includes leukaemia and Hodgkin’s disease but the following are excluded:

- All tumours which are histologically described as pre-malignant, as non-invasive or as cancer in situ,
- All forms of lymphoma in the presence of any Human Immunodeficiency Virus,
- Kaposi’s sarcoma in the presence of any Human Immunodeficiency Virus,
- Any skin cancer other than malignant melanoma.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

26 JUNE 1999

COMA	A state of unconsciousness with no reaction to external stimuli or internal needs persisting continuously with the use of life support systems for a period of at least 96 hours and resulting in permanent neurological deficit. Coma secondary to alcohol or drug misuse is not covered.
CORONARY ARTERY BY-PASS SURGERY (CORONARY ARTERY BY-PASS GRAFTS)	The undergoing of open heart surgery on the advice of a consultant cardiologist to correct narrowing or blockage of one or more coronary arteries with by-pass grafts but excluding balloon angioplasty (except as defined in Angioplasty), laser relief or any other procedures.
DEAFNESS	Total permanent and irreversible loss of all hearing in both ears.
HEART ATTACK	The death of a portion of the heart muscle as a result of inadequate blood supply as evidenced by an episode of typical chest pain, new electrocardiograph changes and by the elevation of cardiac enzymes. The evidence must be consistent with the diagnosis of heart attack.
HEART VALVE REPLACEMENT OR REPAIR	Undergoing open-heart surgery from medical necessity to replace or repair one or more heart valves.
HIV/AIDS COVER FOR MEDICAL STAFF AND OTHER SPECIFIED GROUPS (HIV INFECTION)	No change
KIDNEY FAILURE	No change
LOSS OF LIMBS (LOSS OF HAND OR FOOT)	The permanent physical severance of two or more limbs from above the wrist or ankle joint.
LOSS OF SPEECH	Total, permanent and irreversible loss of the ability to speak as a result of physical injury or disease.

DEFINITIONS OF CONDITIONS HISTORY

26 JUNE 1999

MAJOR ORGAN TRANSPLANT

The actual undergoing as a recipient of, or inclusion on an official UK waiting list for, a transplant of a heart, liver, lung, pancreas or bone marrow.

MOTOR NEURONE DISEASE BEFORE AGE 65 (MOTOR NEURONE DISEASE)

Confirmation by a consultant neurologist of a definite diagnosis of motor neurone disease before the 65th birthday of the life assured.

MULTIPLE SCLEROSIS

A definite diagnosis by a consultant neurologist of multiple sclerosis which satisfies all of the following criteria:

There must be current impairment of motor or sensory function which must have persisted for a continuous period of at least six months.

The diagnosis must be confirmed by diagnostic techniques current at the time of the claim.

PARALYSIS/PARAPLEGIA (PARALYSIS OF A LIMB)

Total and irreversible loss of muscle function or sensation to the whole of any two limbs as a result of injury or disease. The disability must be permanent and supported by appropriate neurological evidence.

PARKINSON'S DISEASE BEFORE AGE 65 (PARKINSON'S DISEASE)

Confirmation by a consultant neurologist of a definite diagnosis of Parkinson's disease before the 65th birthday of the life assured. Parkinson's disease secondary to alcohol or drug misuse is not covered.

PERMANENT AND TOTAL DISABILITY BEFORE AGE 65 (TOTAL AND PERMANENT DISABILITY)

The Guaranteed Sum Assured will be payable:

(a) If the Life Assured is not in any gainful occupation immediately before the onset of disability and suffers, through illness or accident, a mental or physical irreversible disability before the 65th birthday of the Life Assured which, in the opinion of the Chief Medical Officer of Legal & General, results in the Life Assured being permanently unable to perform, without the direct assistance of another person, four or more of the following functions:

(i) mobility – the ability to move from one room to another adjoining room or from one side of a room to another to get in and out of bed or a chair without requiring physical assistance of another person.

Continued

- (ii) continence – the ability to voluntarily control bowel and bladder functions such as to maintain personal hygiene.
- (iii) dressing or undressing self – putting on or taking off all necessary items of clothing without requiring assistance of another person.
- (iv) washing and bathing self – washing or bathing to the extent needed to maintain personal cleanliness without requiring assistance of another person.
- (v) eating – all tasks of getting food into the body once it has been prepared.
- (vi) toileting – getting to and from the toilet, transferring on or off the toilet and associated personal hygiene.

OR

(b) One of the Any Occupation definition or Own Occupation definition wordings below.

Any Occupation definition

If the Life Assured is engaged in gainful occupation immediately before the onset of disability before the 65th birthday of the Life Assured and is, by reason of sickness or accident, totally unable to follow any occupation and in the opinion of the Chief Medical Officer of Legal & General is likely to remain so permanently. Such decision will be based on all of the medical evidence available.

Own Occupation definition

If the Life Assured is engaged in gainful occupation immediately before the onset of disability before the 65th birthday of the Life Assured and is, by reason of sickness or accident, totally unable to follow his/her occupation and in the opinion of the Chief Medical Officer of Legal & General is likely to remain so permanently. Such decision will be based on all of the medical evidence available.

PRE SENILE DEMENTIA BEFORE AGE 65 (DEMENTIA)

A diagnosis, before the 65th birthday of the Life Assured, by a consultant neurologist of presenile dementia. The diagnosis must, at the time it is made, be supported by evidence of progressive deterioration of memory and of the ability to reason and to perceive, understand, express and give effect to ideas.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

18 JANUARY 2004

KIDNEY FAILURE	End stage renal failure presenting as chronic irreversible failure of both kidneys to function, as a result of which regular renal dialysis is initiated or renal transplant is initiated.
LOSS OF LIMBS (LOSS OF HAND OR FOOT)	No change
LOSS OF SPEECH	No change
MAJOR ORGAN TRANSPLANT	No change
MOTOR NEURONE DISEASE	Confirmation by a consultant neurologist of a definite diagnosis of motor neurone disease.
MULTIPLE SCLEROSIS	No change
PARALYSIS/PARAPLEGIA (PARALYSIS OF A LIMB)	No change
PARKINSON'S DISEASE	Confirmation by a consultant neurologist of a definite diagnosis of Parkinson's disease. Parkinson's disease secondary to alcohol or drug misuse is not covered.
PERMANENT AND TOTAL DISABILITY (TOTAL AND PERMANENT DISABILITY)	No change
PROGRESSIVE SUPRANUCLEAR PALSY	The definite diagnosis of progressive supranuclear palsy by a consultant neurologist.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

18 MARCH 2007

Summary – ABI Statement of Best Practice 2006 changes – new headings and wordings, Encephalitis, Primary Pulmonary Hypertension, Systemic Lupus Erythematosus, Terminal Illness and Traumatic Head Injury added. HIV infection definitions combined. **Note: Chronic Lung Disease renamed Respiratory Failure.**

**ALZHEIMER’S DISEASE
– RESULTING IN PERMANENT
SYMPTOMS**

A definite diagnosis of Alzheimer’s disease by a consultant neurologist, psychiatrist or geriatrician. There must be permanent clinical loss of the ability to do all of the following:

- remember;
- reason; and
- perceive, understand, express and give effect to ideas.

For the above definition, the following are not covered:

- Other types of dementia.

**AORTA GRAFT SURGERY
– REQUIRING SURGICAL
REPLACEMENT**

The undergoing of surgery to the aorta with excision and surgical replacement of a portion of the aorta with a graft. The term aorta includes the thoracic and abdominal aorta but not its branches. For the above definition, the following are not covered:

- Any other surgical procedure, for example the insertion of stents or endovascular repair.

**APLASTIC ANAEMIA
– WITH PERMANENT BONE MARROW
FAILURE**

A definite diagnosis of aplastic anaemia by a consultant haematologist. There must be permanent bone marrow failure with anaemia, neutropenia and thrombocytopenia.

**BACTERIAL MENINGITIS
– RESULTING IN PERMANENT
SYMPTOMS**

A definite diagnosis of bacterial meningitis resulting in permanent neurological deficit with persisting clinical symptoms.

For the above definition, the following are not covered:

- All other forms of meningitis other than those caused by bacterial infection.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

18 MARCH 2007

**BENIGN BRAIN TUMOUR
– RESULTING IN PERMANENT
SYMPTOMS**

A non-malignant tumour or cyst in the brain, cranial nerves or meninges within the skull, resulting in permanent neurological deficit with persisting clinical symptoms.

For the above definition, the following are not covered:

- Tumours in the pituitary gland
- Angiomas.

**BLINDNESS
– PERMANENT AND IRREVERSIBLE**

Permanent and irreversible loss of sight to the extent that even when tested with the use of visual aids, vision is measured at 3/60 or worse in the better eye using a Snellen eye chart.

**CANCER
– EXCLUDING LESS ADVANCED
CASES**

Any malignant tumour positively diagnosed with histological confirmation and characterised by the uncontrolled growth of malignant cells and invasion of tissue.

The term malignant tumour includes leukaemia, lymphoma and sarcoma.

For the above definition, the following are not covered:

- All cancers which are histologically classified as any of the following:
 - pre-malignant;
 - non-invasive;
 - cancer in situ;
 - having either borderline malignancy; or
 - having low malignant potential.
- All tumours of the prostate unless histologically classified as having a Gleason score greater than 6 or having progressed to at least clinical TNM classification T2N0M0.
- Chronic lymphocytic leukaemia unless histologically classified as having progressed to at least Binet Stage A.
- Any skin cancer other than malignant melanoma that has been histologically classified as having caused invasion beyond the epidermis (outer layer of skin).

**CARDIOMYOPATHY
– OF SPECIFIED SEVERITY**

A definite diagnosis of cardiomyopathy by a consultant cardiologist. There must be clinical impairment of heart function resulting in the permanent loss of ability to perform physical activities to at least Class 3 of the New York Heart Association classifications of functional capacity*.

For the above definition, the following are not covered:

- Cardiomyopathy secondary to alcohol or drug abuse.
- All other forms of heart disease, heart enlargement and myocarditis.

*NYHA Class 3. Heart disease resulting in marked limitation of physical activities where less than ordinary activity causes fatigue, palpitation, breathlessness or chest pain.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

18 MARCH 2007

HIV INFECTION
 – CAUGHT FROM A BLOOD
 TRANSFUSION, PHYSICAL ASSAULT
 OR ACCIDENT AT WORK
 Continued

- Where HIV infection is caught through a physical assault or as a result of an incident occurring during the course of performing normal duties of employment, the incident must be supported by a negative HIV antibody test taken within five days of the incident.
 - There must be a further HIV test within 12 months confirming the presence of HIV or antibodies to the virus.
- For the above definition, the following is not covered:
- HIV infection resulting from any other means, including sexual activity or drug abuse.

KIDNEY FAILURE
 – REQUIRING DIALYSIS

Chronic and end stage failure of both kidneys to function, as a result of which regular dialysis is necessary.

LIVER FAILURE
 – OF ADVANCED STAGE

- Liver failure due to cirrhosis and resulting in all of the following:
- permanent jaundice
 - ascites
 - encephalopathy.
- For the above definition, the following are not covered:
- Liver disease secondary to alcohol or drug abuse.

LOSS OF HANDS OR FEET
 – PERMANENT PHYSICAL SEVERANCE
 (LOSS OF HAND OR FOOT)

Permanent physical severance of any combination of two or more hands or feet at or above the wrist or ankle joints.

LOSS OF SPEECH
 – PERMANENT AND IRREVERSIBLE

Total permanent and irreversible loss of the ability to speak as a result of physical injury or disease.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

18 MARCH 2007

TOTAL AND PERMANENT DISABILITY

The Guaranteed Sum Assured will be payable:

(a) If the Life Assured is not in gainful occupation immediately before the onset of disability, and suffers through illness or accident, a mental or physical irreversible disability, which in the opinion of The Chief Medical Officer of Legal & General, results in the Life Assured being permanently unable to perform, without the direct assistance of another person, three or more of the following functions:

1. Walking: The ability to walk a distance of 200 metres on flat ground with or without the aid of a walking stick and without stopping or experiencing discomfort.
2. Bending: The ability to get into or out of a standard saloon car, and the ability to bend or kneel to pick up an object from the floor and straighten up again.
3. Communicating: The ability to answer a telephone and to take a message.
4. Reading: Having the required eyesight (corrected if necessary) to be able to read a daily newspaper.
5. Writing: Having the physical ability to write legibly using a pen or a pencil without aid.
6. Climbing: Having the ability to climb up a flight of 12 stairs without stopping or suffering severe discomfort.

OR

(b) If the Life Assured is engaged in a gainful occupation immediately before the onset of disability and is, by reason of sickness or accident, totally unable to follow his/her own occupation and in the opinion of Legal & General is likely to remain so permanently. Such decision will be based on all the medical evidence available. If in gainful employment the claim will be assessed on the occupation followed immediately before the onset of disability.

TRAUMATIC HEAD INJURY – RESULTING IN PERMANENT SYMPTOMS

Death of brain tissue due to traumatic injury resulting in permanent neurological deficit with persisting clinical symptoms.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

23 MAY 2010

HIV INFECTION
 – CAUGHT FROM A BLOOD
 TRANSFUSION, PHYSICAL
 ASSAULT OR ACCIDENT
 AT WORK

Continued

- The incident must have been reported to appropriate authorities and have been investigated in accordance with the established procedures.
 - Where HIV infection is caught through a physical assault or as a result of an incident occurring during the course of performing normal duties of employment, the incident must be supported by a negative HIV antibody test taken within five days of the incident.
 - There must be a further HIV test within 12 months confirming the presence of HIV or antibodies to the virus.
 - The incident causing infection must have occurred in one of the following countries: Australia, Austria, Belgium, Bulgaria, Canada, the Channel Islands, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Hong Kong, Hungary, Iceland, the Isle of Man, Italy, Japan, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, the Netherlands, New Zealand, Norway, Poland, Portugal, Republic of Ireland, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, the United Kingdom and the United States of America.
- For the above definition, the following is not covered:
- HIV infection resulting from any other means, including sexual activity or drug abuse.

KIDNEY FAILURE

No change

LIVER FAILURE

No change

LOSS OF HAND OR FOOT
 – PERMANENT PHYSICAL SEVERANCE

Permanent physical severance of a hand or foot at or above the wrist or ankle joints.

LOSS OF SPEECH

DEFINITIONS OF CONDITIONS HISTORY

23 MAY 2010

MASTECTOMY FOR DUCTAL CARCINOMA IN SITU (DUCTAL CARCINOMA IN SITU OF THE BREAST)
– REQUIRING TOTAL REMOVAL OF THE BREAST

The undergoing of a mastectomy operation (total removal of all the tissue of at least one breast) on the advice of your hospital consultant following the diagnosis of ductal carcinoma in situ of the breast.

For the above definition, the following are not covered:

- Prophylactic mastectomy without histological evidence of ductal carcinoma in situ, and
- Any other surgical procedures such as lumpectomy, partial mastectomy and partial or total subcutaneous mastectomy.

MOTOR NEURONE DISEASE

No change

MULTIPLE SCLEROSIS

No change

MULTIPLE SYSTEM ATROPHY
– RESULTING IN PERMANENT SYMPTOMS

A definite diagnosis of multiple system atrophy by a consultant neurologist. There must be evidence of permanent clinical impairment of either:

- motor function with associated rigidity of movement or
- the ability to coordinate muscle movement or
- bladder control and postural hypotension.

OPEN HEART SURGERY
– WITH MEDIAN STERNOTOMY

The undergoing of surgery requiring median sternotomy (surgery to divide the breastbone) on the advice of a consultant cardiologist to correct any structural abnormality of the heart.

PARALYSIS OF A LIMB
– TOTAL AND IRREVERSIBLE

Total and irreversible loss of muscle function to the whole of any one limb.

PARKINSON'S DISEASE
– RESULTING IN PERMANENT SYMPTOMS

A definite diagnosis of Parkinson's disease by a consultant neurologist. There must be permanent clinical impairment of motor function with associated tremor, rigidity of movement and postural instability.

DEFINITIONS OF CONDITIONS HISTORY

05 AUGUST 2012

TERMINAL ILLNESS

A definite diagnosis by your hospital consultant of an illness that satisfies both of the following:

- The illness either has no known cure or has progressed to the point where it cannot be cured; and
- In the opinion of your hospital consultant and our Medical Officer, the illness is expected to lead to death within 12 months.

No terminal illness claim can be made after the death of the life assured or within the 12 months immediately before the policy expiry date.

If decreasing cover is shown in the policy schedule, the amount payable will be the amount of cover calculated on the date we receive confirmation of the diagnosis.

THIRD DEGREE BURNS

No change

TOTAL AND PERMANENT DISABILITY – OF SPECIFIED SEVERITY

Your policy schedule will show which of the following total and permanent disability definitions applies to you:

Total and permanent disability – unable to do your own occupation ever again.

Loss of the physical or mental ability through an illness or injury to the extent that the life assured is unable to do the material and substantial duties of their own occupation ever again. The material and substantial duties are those that are normally required for, and/or form a significant and integral part of, the performance of the life assured’s own occupation that cannot reasonably be omitted or modified.

Own occupation means your trade, profession or type of work you do for profit or pay. It is not a specific job with any particular employer and is irrespective of location and availability.

The relevant specialists must reasonably expect that the disability will last throughout life with no prospect of improvement, irrespective of when the cover ends or the life assured expects to retire.

For the above definition, disabilities for which the relevant specialists cannot give a clear prognosis are not covered.

Total and permanent disability – unable to do three specified work tasks ever again.

Loss of the physical ability through an illness or injury to do at least three of the six work tasks listed below ever again.

The relevant specialists must reasonably expect that the disability will last throughout life with no prospect of improvement, irrespective of when the cover ends or the life assured expects to retire.

The life assured must need the help or supervision of another person and be unable to perform the task on their own, even with the use of special equipment routinely available to help and having taken any appropriate prescribed medication.

DEFINITIONS OF CONDITIONS HISTORY

05 AUGUST 2012

TOTAL AND PERMANENT DISABILITY
 – OF SPECIFIED SEVERITY
 Continued

The specified work tasks are:

Walking:

The ability to walk more than 200 metres on a level surface.

Climbing:

The ability to climb up a flight of 12 stairs and down again, using the handrail if needed.

Lifting:

The ability to pick up an object weighing 2kg at table height and hold for 60 seconds before replacing the object on the table.

Bending:

The ability to bend or kneel to touch the floor and straighten up again.

Getting in and out of a car:

The ability to get into a standard saloon car, and out again.

Writing:

The manual dexterity to write legibly using a pen or pencil, or type using a desktop personal computer keyboard.

For the above definition, disabilities for which the relevant specialists cannot give a clear prognosis are not covered.

TOTAL AND PERMANENT DISABILITY – OF SPECIFIED SEVERITY
Continued

The life assured must need the help or supervision of another person and be unable to perform the task on their own, even with the use of special equipment routinely available to help and having taken any appropriate prescribed medication.

The specified work tasks are:

Walking:

The ability to walk more than 200 metres on a level surface.

Climbing:

The ability to climb up a flight of 12 stairs and down again, using the handrail if needed.

Lifting:

The ability to pick up an object weighing 2kg at table height and hold for 60 seconds before replacing the object on the table.

Bending:

The ability to bend or kneel to touch the floor and straighten up again.

Getting in and out of a car:

The ability to get into a standard saloon car, and out again.

Writing:

The manual dexterity to write legibly using a pen or pencil, or type using a desktop personal computer keyboard.

DEFINITIONS OF CONDITIONS HISTORY

21 SEPTEMBER 2014

CANCER
– EXCLUDING LESS ADVANCED
CASES

Any malignant tumour positively diagnosed with histological confirmation and characterised by the uncontrolled growth of malignant cells and invasion of tissue.

The term malignant tumour includes leukaemia, sarcoma and lymphoma except cutaneous lymphoma (lymphoma confined to the skin).

For the above definition, the following are not covered:

- All cancers which are histologically classified as any of the following:
 - pre-malignant;
 - non-invasive;
 - cancer in situ;
 - having either borderline malignancy; or
 - having low malignant potential.
- All tumours of the prostate unless histologically classified as having a Gleason score greater than 6 or having progressed to at least clinical TNM classification T2N0M0.
- Malignant melanoma unless it has been histologically classified as having caused invasion beyond the epidermis (outer layer of the skin).
- Any other skin cancer (including cutaneous lymphoma) unless it has been histologically classified as having caused invasion in the lymph glands or spread to distant organs.

**CARCINOMA IN SITU OF THE
BREAST**
– TREATED BY SURGERY

The undergoing of surgery on the advice of your hospital consultant following the diagnosis of carcinoma in situ of the breast.

For the above definition the following is not covered:

- Any other type of treatment.

**LOW GRADE PROSTATE CANCER
– REQUIRING TREATMENT**

The undergoing of treatment on the advice of your hospital consultant following the diagnosis of a malignant tumour of the prostate positively diagnosed and histologically classified as having a Gleason score between 2 and 6 inclusive and having progressed to clinical TNM classification between T1N0M0 and T2aN0M0.

For the above definition, the following are not covered:

- Prostatic intraepithelial neoplasia (PIN)
- Observation or surveillance
- Surgical biopsy

**MAJOR ORGAN TRANSPLANT
– FROM ANOTHER DONOR**

The undergoing as a recipient of a transplant from another donor, of bone marrow or of a complete heart, kidney, lung, pancreas, liver, or a lobe of the liver, or inclusion on an official UK, Channel Island or Isle of Man waiting list for such a procedure.

For the above definition, the following is not covered:

- Transplant of any other organs, parts of organs, tissues or cells.

**MOTOR NEURONE DISEASE
– RESULTING IN PERMANENT
SYMPTOMS**

A definite diagnosis of one of the following motor neurone diseases by a Consultant Neurologist:

- Amyotrophic lateral sclerosis (ALS)
- Primary lateral sclerosis (PLS)
- Progressive bulbar palsy (PBP)
- Progressive muscular atrophy (PMA)
- Spinal muscular atrophy (SMA)

There must also be permanent clinical impairment of motor function.

STROKE – RESULTING IN SYMPTOMS LASTING AT LEAST 24 HOURS	No change	JUN 1996
SYSTEMIC LUPUS ERYTHEMATOSUS	No change	JUL 1997
TERMINAL ILLNESS	A definite diagnosis by your hospital consultant of an illness that satisfies both of the following: <ul style="list-style-type: none"> • The illness either has no known cure or has progressed to the point where it cannot be cured; and • In the opinion of your hospital consultant and our medical officer, the illness is expected to lead to death within 12 months. No terminal illness claim can be made after the death of the life assured. If decreasing cover is shown in your Policy Schedule, the amount payable will be the amount of cover calculated on the date that it is established that the life assured has met our definition of terminal illness. TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

22 APRIL 2018

Summary – Enhancements and amendments made to a number of illnesses. Alzheimer’s disease is now covered as part of ‘Dementia including Alzheimer’s disease’ condition. Removal of an eyeball definition is now only available under Critical Illness Extra. Progressive supranuclear palsy is now only available under Critical Illness Extra and is now covered as part of the ‘Parkinson’s plus syndrome’ condition.

ALZHEIMER’S DISEASE

Incorporated in to ‘Dementia including Alzheimer’s disease’ definition. See below for full definition.

ANGIOPLASTY

No change

AORTA GRAFT SURGERY

No change

**APLASTIC ANAEMIA
– CATEGORISED AS VERY SEVERE**

A definite diagnosis of very severe aplastic anaemia by a consultant haematologist and evidenced by bone marrow histology. There must be permanent bone marrow failure with: anaemia, thrombocytopenia and an absolute neutrophil count of less than $0.2 \times 10^9/L$.

BACTERIAL MENINGITIS

No change

**BENIGN BRAIN TUMOUR
– RESULTING IN EITHER SPECIFIED
TREATMENT OR PERMANENT
SYMPTOMS**

A non-malignant tumour or cyst originating from the brain, cranial nerves or meninges within the skull, resulting in either:

- surgical removal;
- radiotherapy;
- chemotherapy; or
- permanent neurological deficit with persisting clinical symptoms.

For the above definition, the following are not covered:

- tumours in the pituitary gland;
- tumours originating from bone tissue; or
- angioma and cholesteatoma.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

22 APRIL 2018

**BLINDNESS
– PERMANENT AND IRREVERSIBLE**

Permanent and irreversible loss of sight to the extent that even when tested with the use of visual aids, vision is measured at 6/60 or worse in the better eye using a Snellen eye chart or visual field is reduced to 20 degrees or less of an arc, as measured by an ophthalmologist.

**CANCER
– EXCLUDING LESS ADVANCED
CASES**

Any malignant tumour positively diagnosed with histological confirmation and characterised by the uncontrolled growth of malignant cells and invasion of tissue.
The term malignant tumour includes leukaemia, sarcoma, pseudomyxoma peritonei, merkel cell cancer and lymphoma except cutaneous lymphoma (lymphoma confined to the skin).

For the above definition, the following are not covered:

- All cancers which are histologically classified as any of the following:
 - pre-malignant;
 - non-invasive;
 - cancer in situ;
 - having either borderline malignancy; or
 - having low malignant potential.
- All tumours of the prostate unless histologically classified as having a Gleason score of 7 or above or having progressed to at least clinical TNM classification T2bN0M0.
- Malignant melanoma unless it has been histologically classified as having caused invasion beyond the epidermis (outer layer of skin).
- Any other skin cancer (including cutaneous lymphoma) unless it has been histologically classified as having caused invasion in the lymph glands or spread to distant organs.

**CARCINOMA IN SITU OF THE
BREAST**

No change

**CARDIAC ARREST
– WITH INSERTION OF
A DEFIBRILLATOR**

Sudden loss of heart function with interruption of blood circulation around the body resulting in unconsciousness, requiring resuscitation and resulting in either of the following devices being surgically implanted:

- implantable cardioverter-defibrillator (ICD); or
- cardiac resynchronisation therapy with defibrillator (CRT-D).

For the above definition, the following are not covered:

- insertion of a pacemaker;
- insertion of a defibrillator without cardiac arrest; or
- cardiac arrest secondary to drug intake.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

22 APRIL 2018

CARDIOMYOPATHY
– OF SPECIFIED SEVERITY OR
RESULTING IN SPECIFIED
TREATMENT

A definite diagnosis of cardiomyopathy by a consultant cardiologist. There must be clinical impairment of heart function resulting in at least one of the following:

- permanent and irreversible ejection fraction of 39% or less;
- permanent loss of ability to perform physical activities to at least Class 3 of the New York Heart Association classifications of functional capacity*; or
- implantable cardioverter-defibrillator (ICD).

For the above definition, the following are not covered:

- cardiomyopathy secondary to alcohol or drug intake;
- all other forms of heart disease, heart enlargement and myocarditis.

*NYHA Class 3. Heart disease resulting in marked limitation of physical activities where less than ordinary activity causes fatigue, palpitation, breathlessness or chest pain.

COMA
– WITH ASSOCIATED PERMANENT
SYMPTOMS

A state of unconsciousness with no reaction to external stimuli or internal needs which:

- requires the use of life support systems; and
- has associated permanent neurological deficit with persisting clinical symptoms.

For the above definition, the following are not covered:

- medically induced coma;
- coma secondary to alcohol or drug intake.

**CORONARY ARTERY BYPASS
GRAFTS**
– WITH SURGERY TO DIVIDE THE
BREASTBONE OR THORACTOMY

The undergoing of surgery to divide the breastbone (median sternotomy) or thoracotomy on the advice of a consultant cardiologist to correct narrowing or blockage of one or more coronary arteries with bypass grafts.

For the above definition, the following is not covered:

- any other surgical procedure or treatment.

DEMENTIA INCLUDING ALZHEIMER'S DISEASE – RESULTING IN PERMANENT SYMPTOMS

A definite diagnosis of dementia by a consultant neurologist, psychiatrist or geriatrician. The diagnosis must be supported by evidence of progressive loss of ability to do all of the following:

- remember;
- reason; and
- to perceive, understand, express and give effect to ideas.

For the above definition, the following are not covered:

- dementia secondary to alcohol or drug intake.

ENCEPHALITIS

No change

HEART ATTACK

No change

HEART VALVE REPLACEMENT OR REPAIR

No change

HIV INFECTION

Infection by Human Immunodeficiency Virus resulting from:

- a blood transfusion given as part of medical treatment;
- a physical assault; or
- an incident occurring during the course of performing normal duties of employment; after the start of the policy and satisfying all of the following:
 - The incident must have been reported to appropriate authorities and have been investigated in accordance with the established procedures.
 - Where HIV infection is caught through a physical assault or as a result of an incident occurring during the course of performing normal duties of employment, the incident must be supported by a negative HIV antibody test taken within 5 days of the incident.
 - There must be a further HIV test within 12 months confirming the presence of HIV or antibodies to the virus.
 - The incident causing infection must have occurred in one of the following countries: Australia, Austria, Belgium, Bulgaria, Canada, the Channel Islands, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Hong Kong, Hungary, Iceland, the Isle of Man, Italy, Japan, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, the Netherlands, New Zealand, Norway, Poland, Portugal, Republic of Ireland, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, the United Kingdom and the United States of America.

For the above definition, the following is not covered:

- HIV infection resulting from any other means, including sexual activity or drug intake.

DEMENTIA INCLUDING ALZHEIMER'S DISEASE – RESULTING IN PERMANENT SYMPTOMS

A definite diagnosis of dementia by a consultant neurologist, psychiatrist or geriatrician. The diagnosis must be supported by evidence of progressive loss of ability to do all of the following:

- remember;
- reason; and
- to perceive, understand, express and give effect to ideas.

ENCEPHALITIS

No change

HEART ATTACK

Death of heart muscle, due to inadequate blood supply, that has resulted in all of the following evidence of acute myocardial infarction:

- new characteristic electrocardiographic changes or other positive findings on diagnostic imaging tests;
- the characteristic rise of biochemical cardiac specific markers such as troponins or enzymes.

The evidence must show a definite acute myocardial infarction. For the above definition, the following are not covered:

- other acute coronary syndromes;
- angina without myocardial infarction.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

FEBRUARY 2018

Summary – Children’s Critical Illness Extra – available for an additional cost*.

**BENIGN SPINAL CORD TUMOUR
– RESULTING IN EITHER SPECIFIED
TREATMENT OR PERMANENT
SYMPTOMS**

A non-malignant tumour originating from the spinal cord, spinal nerves or meninges within the spinal canal, resulting in either:

- surgical removal;
- radiotherapy;
- chemotherapy; or
- permanent neurological deficit with persisting clinical symptoms.

For the above definition, the following are not covered:

- angiomas;
- cysts;
- granulomas;
- haematomas; or
- osteophytes.

**BRAIN INJURY DUE TO ANOXIA
OR HYPOXIA
– RESULTING IN PERMANENT
SYMPTOMS**

Death of brain tissue due to inadequate oxygen supply resulting in permanent neurological deficit with persisting clinical symptoms.

CEREBRAL PALSY

A definite diagnosis of cerebral palsy by a hospital consultant resulting in permanent neurological deficit with persisting clinical symptoms.

**CHILD’S DIABETES MELLITUS
TYPE 1
– WITH SPECIFIED TREATMENT**

A definite diagnosis of type 1 insulin dependent diabetes mellitus by a hospital consultant, with the use of permanent insulin injections. For the above definition, the following are not covered:

- gestational diabetes;
- type 2 diabetes (including type 2 diabetes treated with insulin).

FEB 2018

NOV 2018

JUL 2019

*paid as an additional benefit.

TABLE OF CONDITIONS HISTORY

DEFINITIONS OF CONDITIONS HISTORY

FEBRUARY 2018

**CHILD'S INTENSIVE CARE BENEFIT
– REQUIRING MECHANICAL
VENTILATION FOR SEVEN DAYS**

Sickness or injury resulting in continuous mechanical ventilation by means of tracheal intubation for seven consecutive days (24 hours per day) or more in an intensive care unit in a UK hospital.

- for the above definition, the following is not covered: Sickness or injury resulting in mechanical ventilation secondary to alcohol or drug intake;
- premature birth (before 37 weeks).

CYSTIC FIBROSIS

A definite diagnosis of cystic fibrosis by a hospital consultant.

DOWN'S SYNDROME

A definite diagnosis of Down's syndrome by a hospital consultant.

**HYDROCEPHALUS
– TREATED WITH INVASIVE SURGERY
TO THE BRAIN TISSUE**

The undergoing of invasive surgery to brain tissue to treat hydrocephalus.

MUSCULAR DYSTROPHY

A definite diagnosis of muscular dystrophy by a hospital consultant.

**SEVERE CROHN'S DISEASE
– TREATED WITH TWO SURGICAL
INTESTINAL RESECTIONS OR
REMOVAL OF ENTIRE
LARGE BOWEL**

A definite diagnosis of Crohn's disease by a consultant gastroenterologist resulting in either:

- surgical intestinal resection to remove part of the small intestine or bowel on at least two separate occasions; or
- removal of entire large bowel (total colectomy).

For the above definition, the following is not covered:

- surgical treatment for abscesses, fistulas or strictures.

**SPINA BIFIDA MENINGOCELE
AND MYELOMENINGOCELE**

A definite diagnosis of spina bifida meningocele or myelomeningocele by a hospital consultant.

For the above definition, the following are not covered:

- spina bifida occulta.

**ULCERATIVE COLITIS
– RESULTING IN THE REMOVAL OF
THE ENTIRE LARGE BOWEL**

A definite diagnosis of ulcerative colitis confirmed by a consultant gastroenterologist, resulting in removal of the entire large bowel (total colectomy).
