

Muskuloskeletal Care Pathway

Helping our Group Income Protection customer's employees access the right support and treatment during musculoskeletal diagnosis and recovery

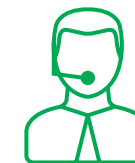

[Muskuloskeletal conditions are the second largest single cause of sickness absence in the UK for men and women.](#) The term 'musculoskeletal disorders' (MSDs) covers a broad range of disorders and injuries that affect the joints, bones, muscles and connective tissue. [MSDs include rheumatoid arthritis, osteoarthritis, ankylosing spondylitis and lower back pain.](#) While you cannot prevent all MSDs, it is very important you minimise risks for workers, and build in systems for early reporting of symptoms, proper treatment and suitable rehabilitation.

We place the employee at the heart of our approach. If an employee needs help, our Rehabilitation Specialists can carry out an assessment, to establish what care pathway would be most beneficial and appropriate. Our Muskuloskeletal Care Pathway makes accessing the right resources quick and easy, from physiotherapy to creating a tailored return to work plan.

[MSDs include rheumatoid arthritis, osteoarthritis, ankylosing spondylitis and lower back pain.](#) While you cannot prevent all MSDs, it is very important you minimise risks for workers, and build in systems for early reporting of symptoms, proper treatment and suitable rehabilitation.

We place the employee at the heart of our approach. If an employee needs help, our Rehabilitation Specialists can carry out an assessment, to establish what care pathway would be most beneficial and appropriate. Our Muskuloskeletal Care Pathway makes accessing the right resources quick and easy, from physiotherapy to creating a tailored return to work plan.

Muskuloskeletal Care Pathway

Helping our Group Income Protection customer's employees access the right support and treatment during musculoskeletal diagnosis and recovery

[Muskuloskeletal conditions are the second largest single cause of sickness absence in the UK for men and women.](#) The term 'musculoskeletal disorders' (MSDs) covers a broad range of disorders and injuries that affect the joints, bones, muscles and connective tissue. [MSDs include rheumatoid arthritis, osteoarthritis, ankylosing spondylitis and lower back pain.](#) While you cannot prevent all MSDs, it is very important you minimise risks for workers, and build in systems for early reporting of symptoms, proper treatment and suitable rehabilitation.

We place the employee at the heart of our approach. If an employee needs help, our Rehabilitation Specialists can carry out an assessment, to establish what care pathway would be most beneficial and appropriate. Our Muskuloskeletal Care Pathway makes accessing the right resources quick and easy, from physiotherapy to creating a tailored return to work plan.
