

# We're evolving

For a business to flourish, we understand that progress is key. That's why we continually refine SmarterCriteria, and it delivers more benefits than ever. Our mortgage criteria search tool is tailor-made for busy advisers like you, to make your life easier.

Once you've entered a client's mortgage requirements, it does the research for you, quickly matching the most appropriate lenders from our panel to their circumstances. And now it's faster, streamlined, and even more accurate.

Since launching in January 2019, we've listened to what you need, making investments and developments. And we're committed to always doing so, to help you work smarter.

We recognise that your business needs to keep evolving - and therefore so do we.
